National Conservation Grant Scheme

Dublin City Council administers the Department of Environment's National Conservation Grants Scheme for the Dublin City Area. Under the scheme grants will be awarded for specified works to structures which are on the Record of protected Structures.

The fundamental objective of undertaking conservation works on a structure should be to restrain the process of decay without damaging the character of a structure or altering the fabric and features which make the structure of special architectural, historical, archaeological, artistic, cultural, scientific, social or technical interest. To qualify, works should normally be carried out using traditional methods and materials, appropriate to the structure, its history and its condition. When replacement is necessary, it should be done on a like-for-like basis. Because of the importance of retaining historic fabric, a number of small repairs, eg. splicing-in of new elements in a historic window, will often be more appropriate than complete renewal.

The Department of the Environment and Local Government's Conservation Guidelines and Advice Series, sets out the methods and standards of conservation required for works grant-aided under the scheme.

Grants are allocated on a yearly basis and notification of the latest date for receipt of applications (normally the end of January each year) is posted in the local press at the end of each year. Further information on the scheme can be found on the Dublin City Council website. This website also includes useful links and documents on conservation matters.

Please note that this scheme is subject to an annual allocation of funding from the Department of Environment, Heritage and Local Government. The amount allocated is subject to change on an annual basis. Please contact Dublin City Council Conservation Section or visit our website for further information.
